

Schesir[®]

C A T A L O G U E

From the beginning, Schesir chose nature.

Founded in 1999, the Brand immediately offered a real innovation for the European market: the first pet food made with premium quality, 100% natural ingredients.

Since then, the history of Schesir has been a constant search for the best ingredients, as well as the most appetising recipes, with no added colourings or preservatives, capable of contributing to the wellbeing of dogs and cats.

Now, after more than 20 years, Schesir is the 1st specialist brand in Italy offering more than 200 recipes in different textures and preparations, to meet all cats and dogs needs.

Respect for the planet we live on.

Quality and innovation, together with care for the environment and the community, have always guided us in the development of food that is, in every respect, respectful of the planet on which we all - humans, animals and plants - live.

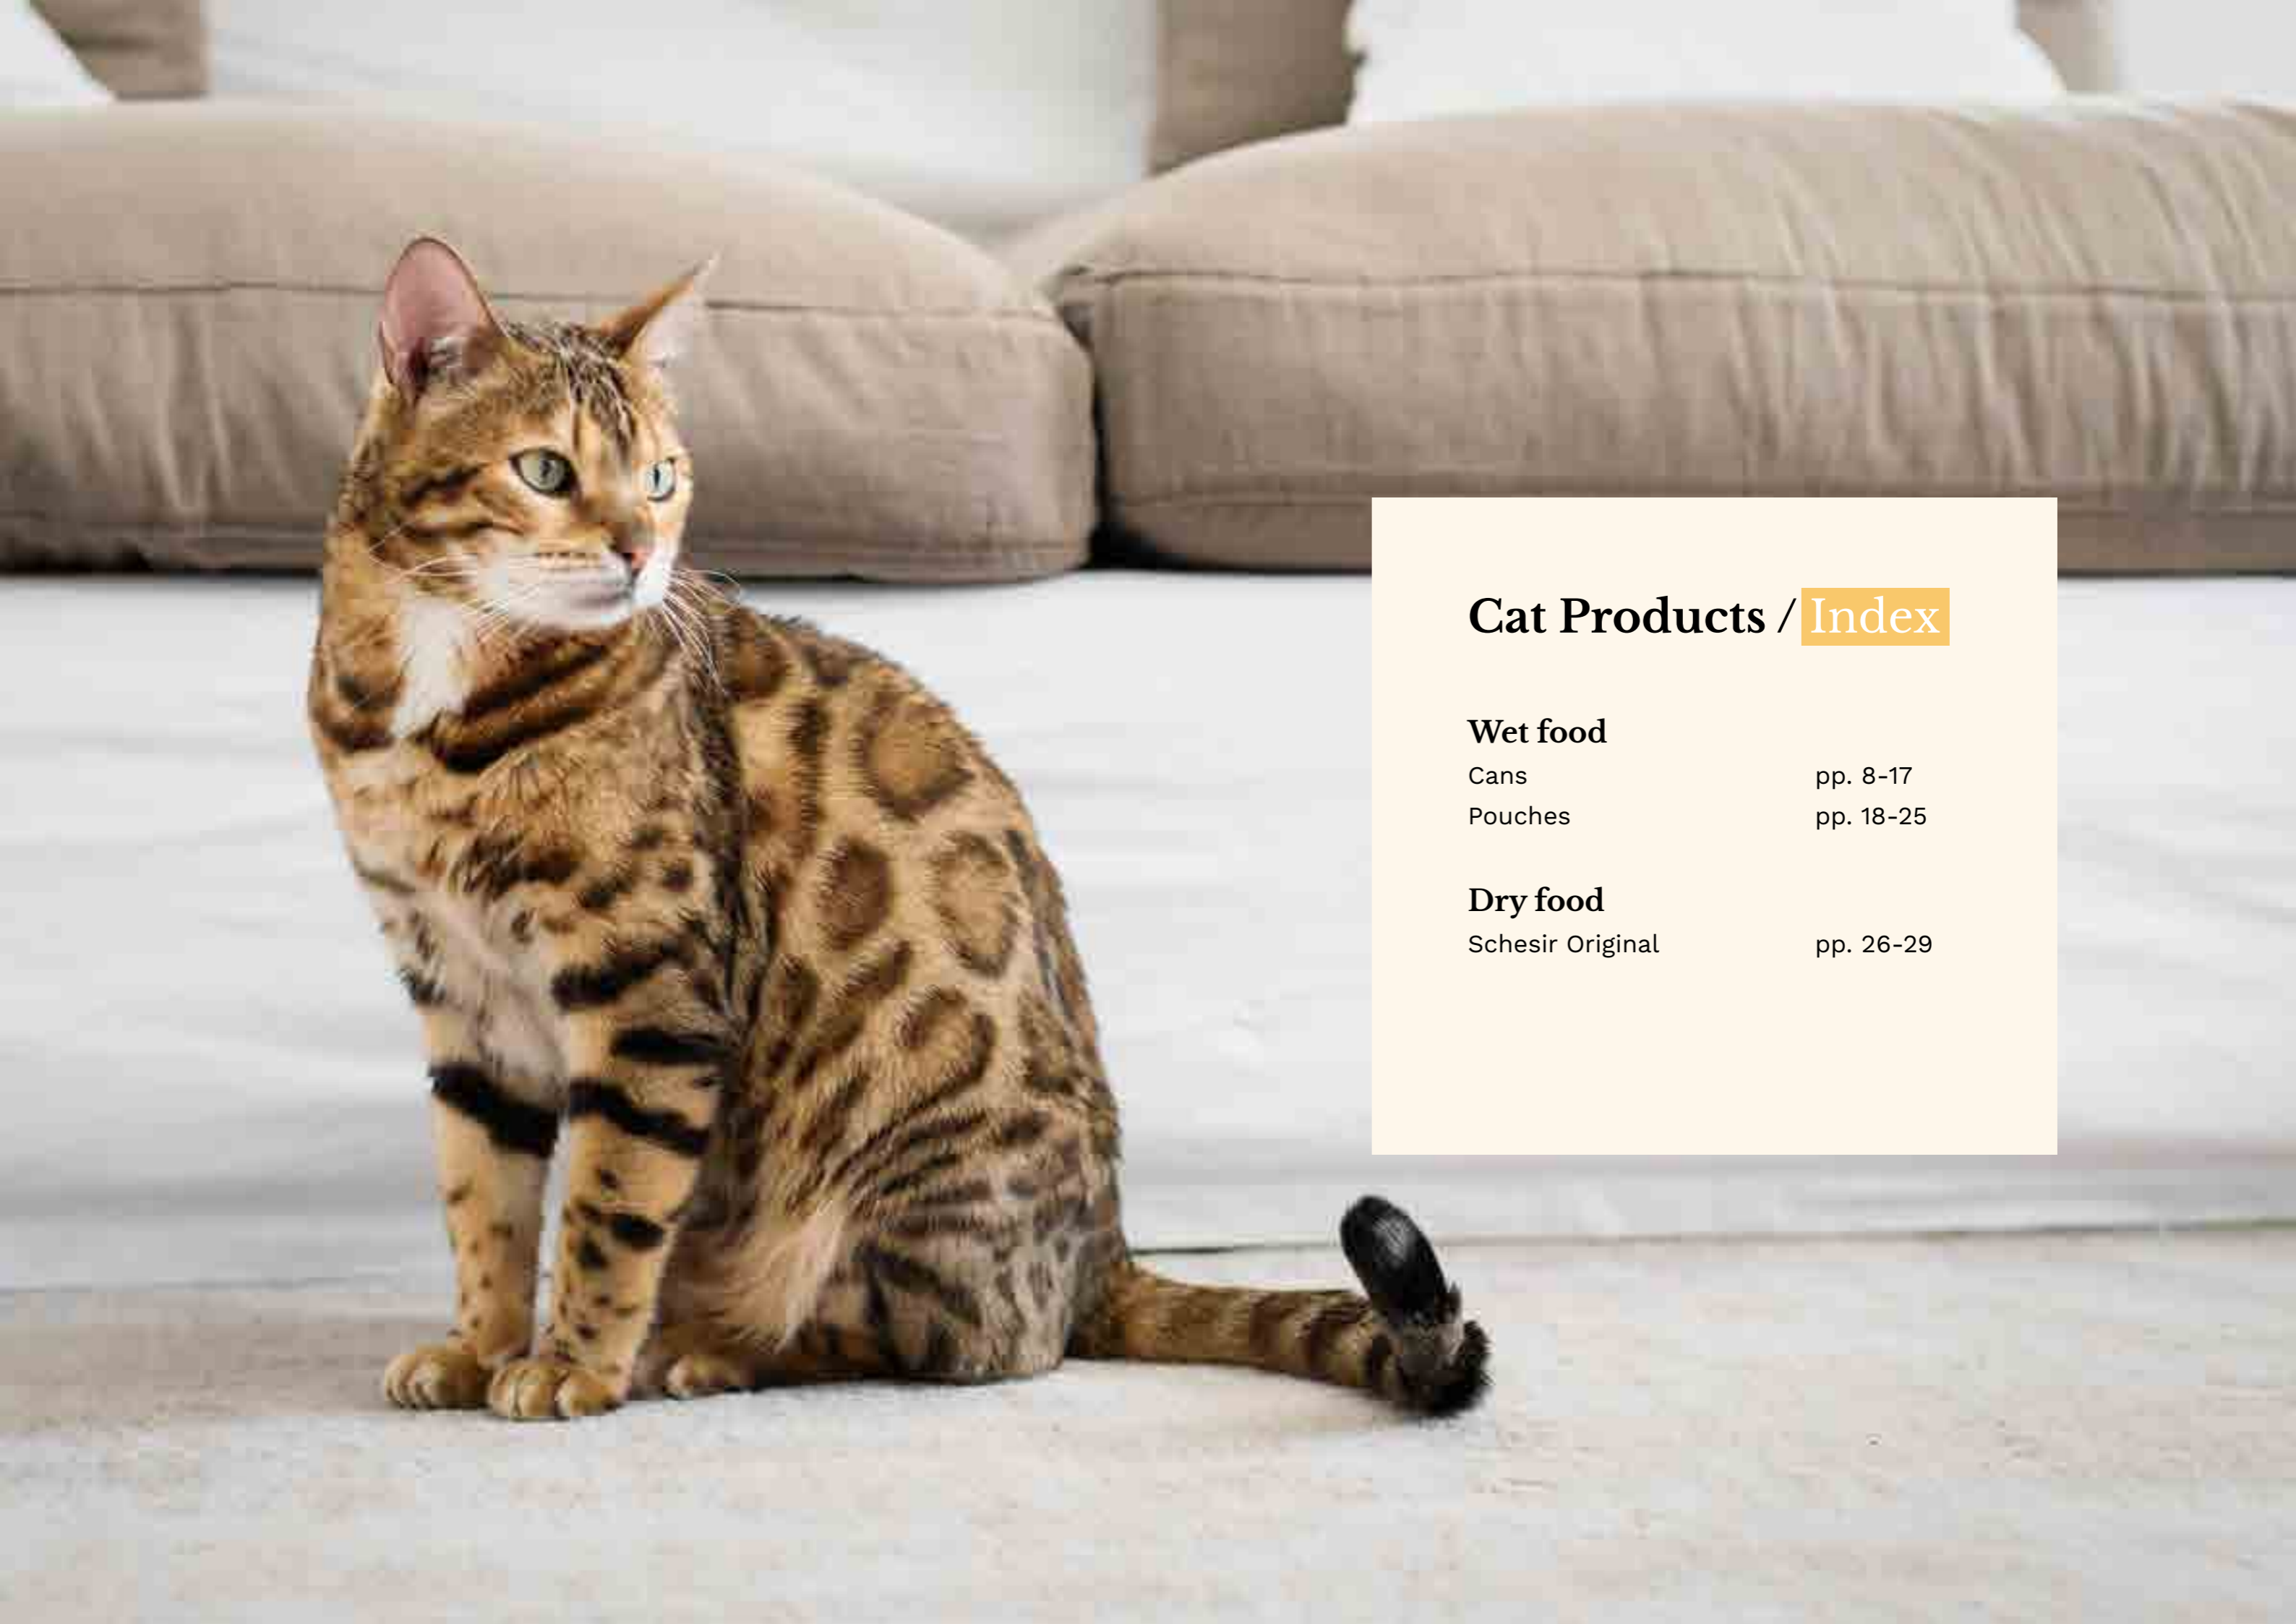

From production to sales.

The last big step dates back to the end of 2020, with the acquisition of Cerere Produzione, a company in Neive (CN) that produces and packages dry pet food. An important milestone that allows us to oversee the entire supply chain, from production to sales, and to monitor and guarantee the complete and high quality of the product.

Quality and production.

We select the best suppliers by imposing strict quality standards, we constantly check 9 different parameters during all stages of production, at least on an hourly basis, to ensure that the best possible product is accurately bagged. And we don't stop there. Our checks continue afterwards, taking samples of the packs once they are on the shelf, and checking the appearance, colour and consistency of the product against the standard of products leaving the factory.
